Hello esteemed city leaders,

My husband Wiley and I were not able to attend the meeting that was held on Monday, June 19, regarding the PRT infrastructure plans and possibilities. We are very much in favor of Milpitas bringing this technology to our city.

Considering the challenges we face with climate change, plus the positive opportunities for many to use the PRT system, we believe this is a wonderful option that is forward-looking and would be very helpful to our community. It's also good to think of Milpitas as being in the forefront of the future of transportation.

Please consider the PRT with the future of our children and of the planet in mind.

Respectfully yours,

Wiley and Deborah Rankin  
2041 Arizona Avenue,  
Milpitas, CA 95035
